**--ABSTRACT OF THE DISCLOSURE**

A multimedia device adapted for use on portable computers is movably mounted on a portable computer which consists of a first member and a second member that are openable and foldable relative to each other. When the portable computer is opened, the multimedia device may be turned to a use position. The multimedia device has a latch member turnable to latch and couple the first and second members in a closed condition when they are moved too close to each other for folding.--
